with the slavish the washing for ten persons with the simple cost of TWO CENTS will please read this. This surface is called B. T. BABBITT'S SOAP POWDER, it being reduced to a powder comes very much cheaper than in any other form. Bar soap contains twenty-five per cent of water in a chryvitalized state, otherwise it would not hold together. While Bablatt's is reduced to a powder and contains more washing material than any other article in the world, and does not lose in weight like bar soap by standing; if har soap stands in the open air one year it will lose from twenty-five to thirty per cent.—of course this has must be water and nothing else, therefore it cannot be washing material. Babbitt has had applications from all pairs of the country for the exclusive right for selling, but as yet has sold no exclusive rights. The average sales are about two and a half tuns per day—which costs by the bot? I cents. A deduction is made by the 10 boxes of 10 per cent., 5 boxes 5 per cent.
